

aws INNOVATE

AI/ML EDITION

24 February 2022

Machine learning for developers

Enhance your customer experience

Janos Schwellach

Developer Specialist Solutions Architect, DevAx
AWS

It is difficult to think of a **major industry** that **AI will not transform**. This includes healthcare, education, transportation, retail, communications, and agriculture. There are surprisingly **clear paths for AI to make a big difference** in all of these industries.

Andrew Ng

Computer Scientist and Global Leader in AI

Stanford University

Agenda

- What is AI/ML
- The AWS AI/ML Services
- Demo of Amazon Personalize

What is it?

Artificial intelligence

Any technique that enables computers to mimic human intelligence using logic, if-then statements, and ML (including deep learning)

Machine learning

Subset of AI that uses machines to search for patterns in data to build logic models automatically

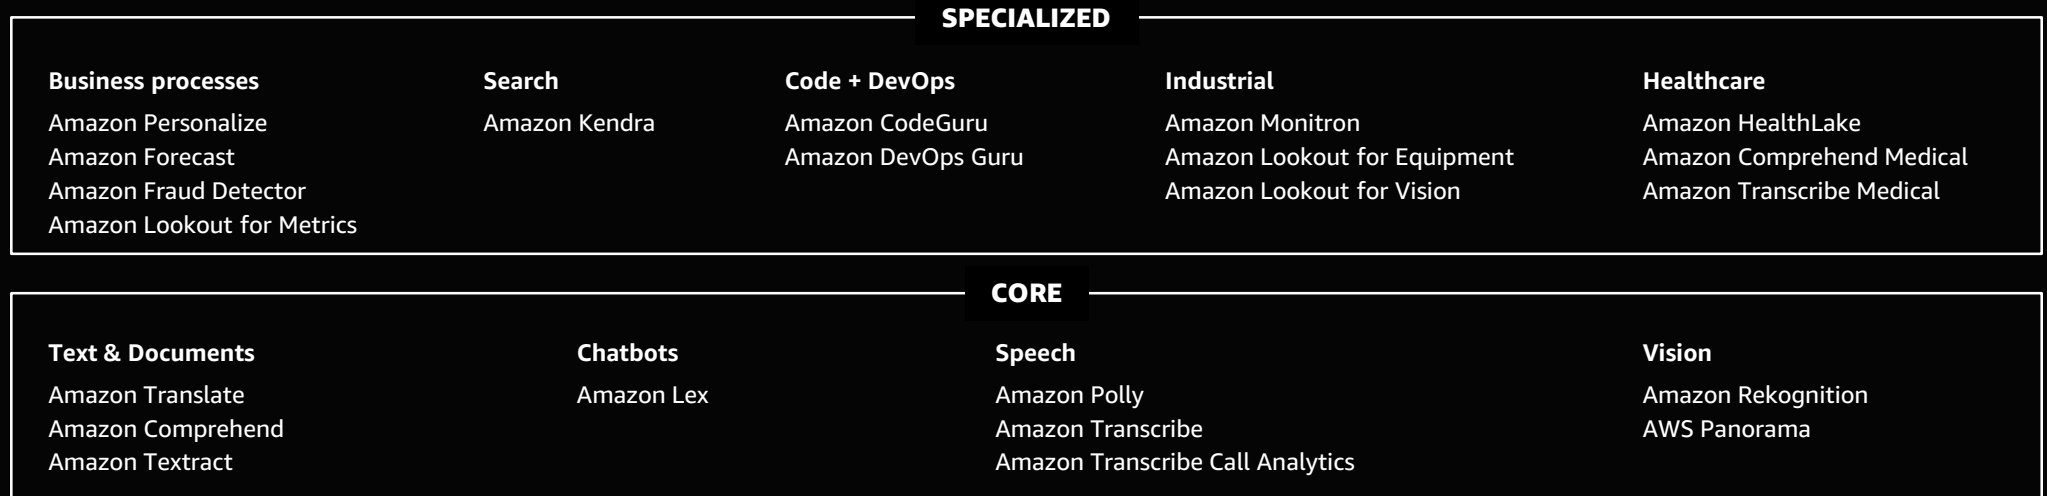

Deep learning

Subset of ML composed of deeply multi-layered neural networks that perform tasks like speech and image recognition

How can the AWS ML Stack help you?

BROADEST AND MOST COMPLETE SET OF MACHINE LEARNING CAPABILITIES

AI SERVICES

ML SERVICES

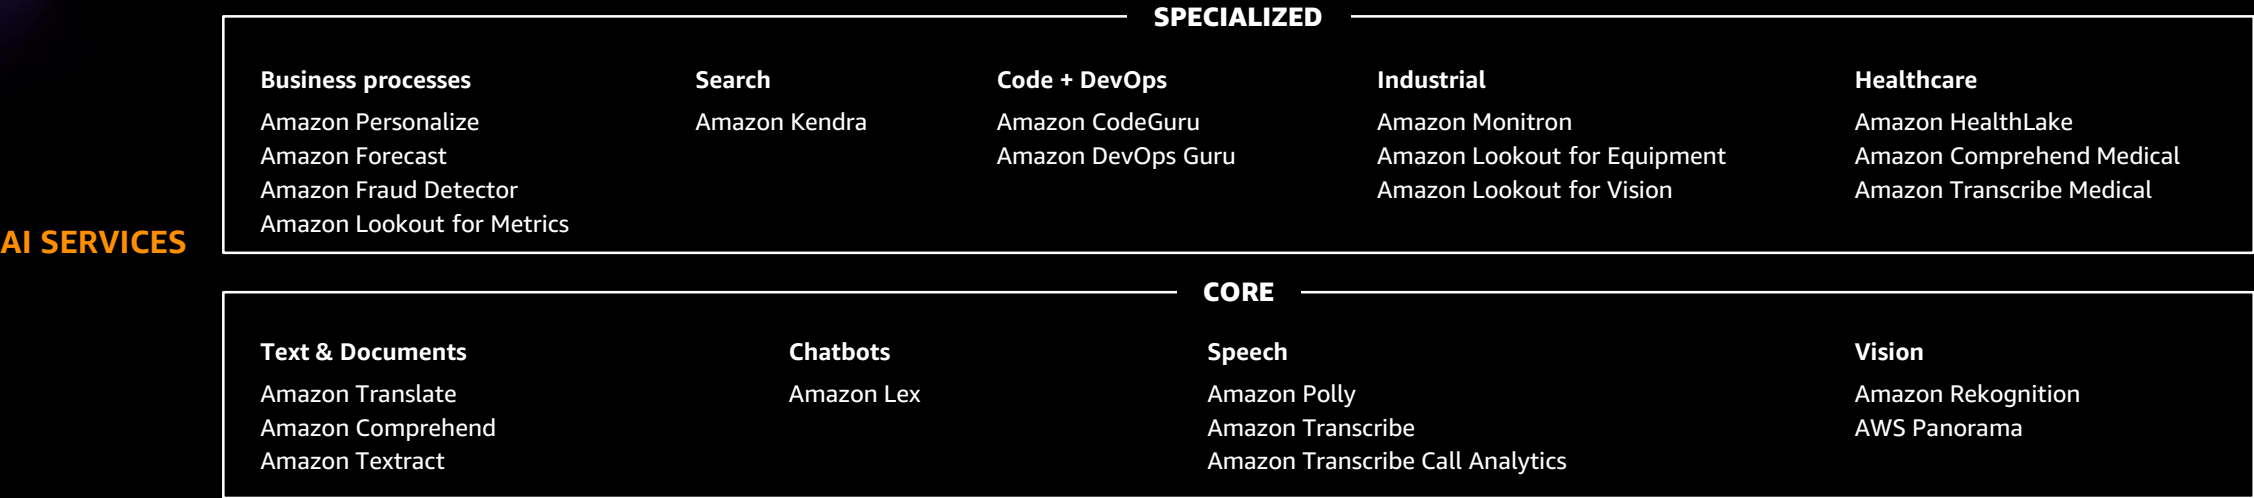

ML FRAMEWORKS & INFRASTRUCTURE

PyTorch, Apache MXNet, TensorFlow	Amazon Elastic Compute Cloud (Amazon EC2)	CPU	GPU	AWS Inferentia	AWS Trainium	Habana Gaudi	FPGA	Elastic inference
-----------------------------------	---	-----	-----	----------------	--------------	--------------	------	-------------------

Amazon Personalize

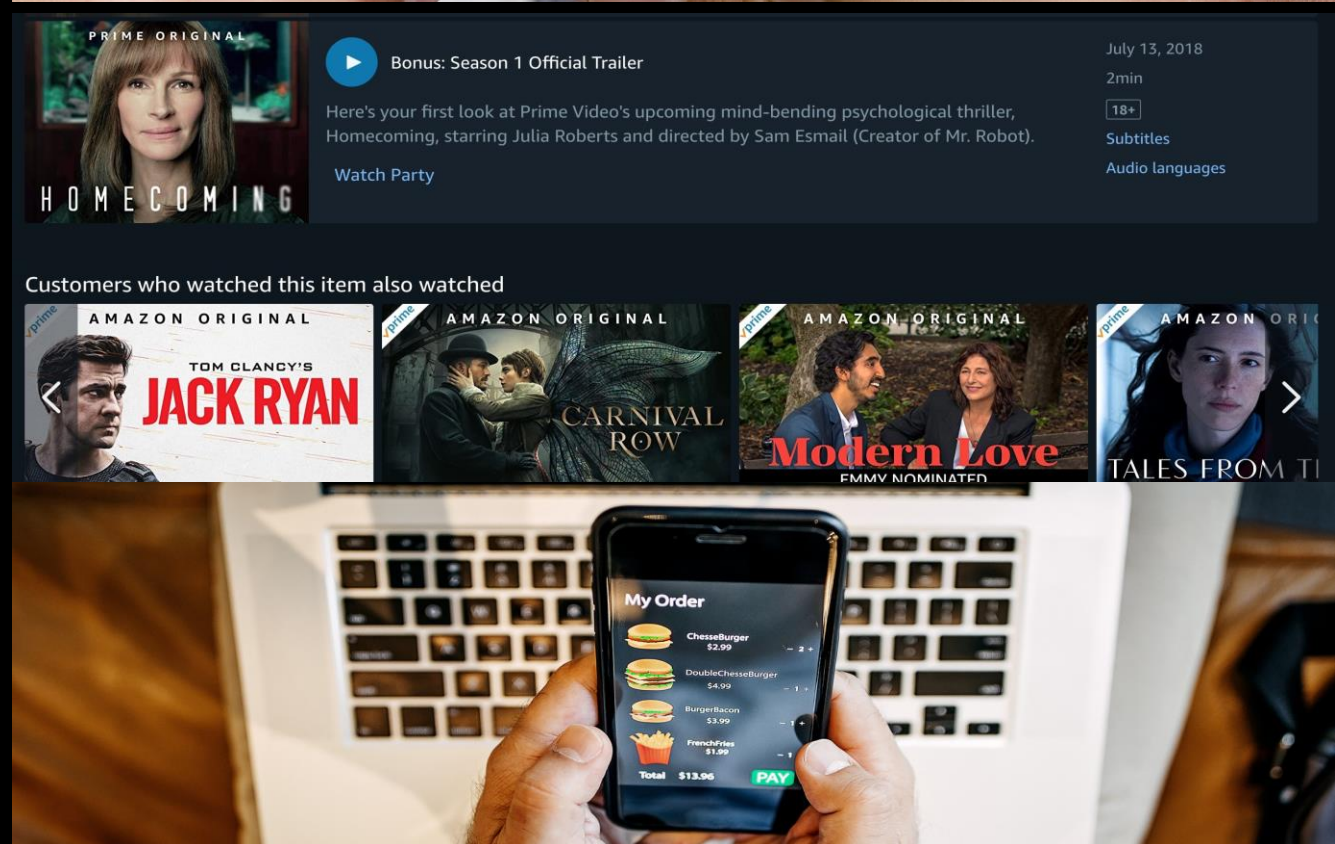

The current landscape

Market leaders are investing in personalization to meet customer expectations

63%

of customers see **PERSONALISATION**
AS THE STANDARD LEVEL OF SERVICE*

* [Source](#)

IMPROVING BUSINESS OUTCOMES

The power of personalization

ACQUISITION AND RETENTION

Attracting new customers
Retaining customers in a crowded
digital environment

ENGAGEMENT

Understanding, measuring, and improving
user experiences across digital channels
Increasing time spent
engaging with products and content

EFFICIENCIES AND REVENUE

Improving digital marketing efficiencies
Increasing average revenue per user

DISCOVERABILITY

Helping customers easily and quickly
discover products and content they want
Highlight new products,
content, and promotion offerings

PIONEERING PERSONALIZATION AT AMAZON

The evolution over 20+ years

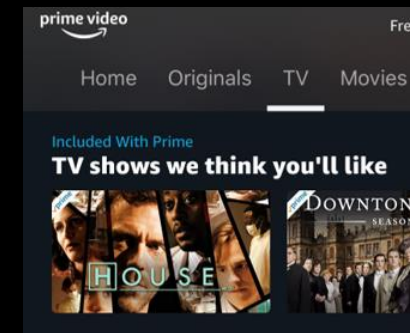

THEN

First feature launched for recommendations in 1998

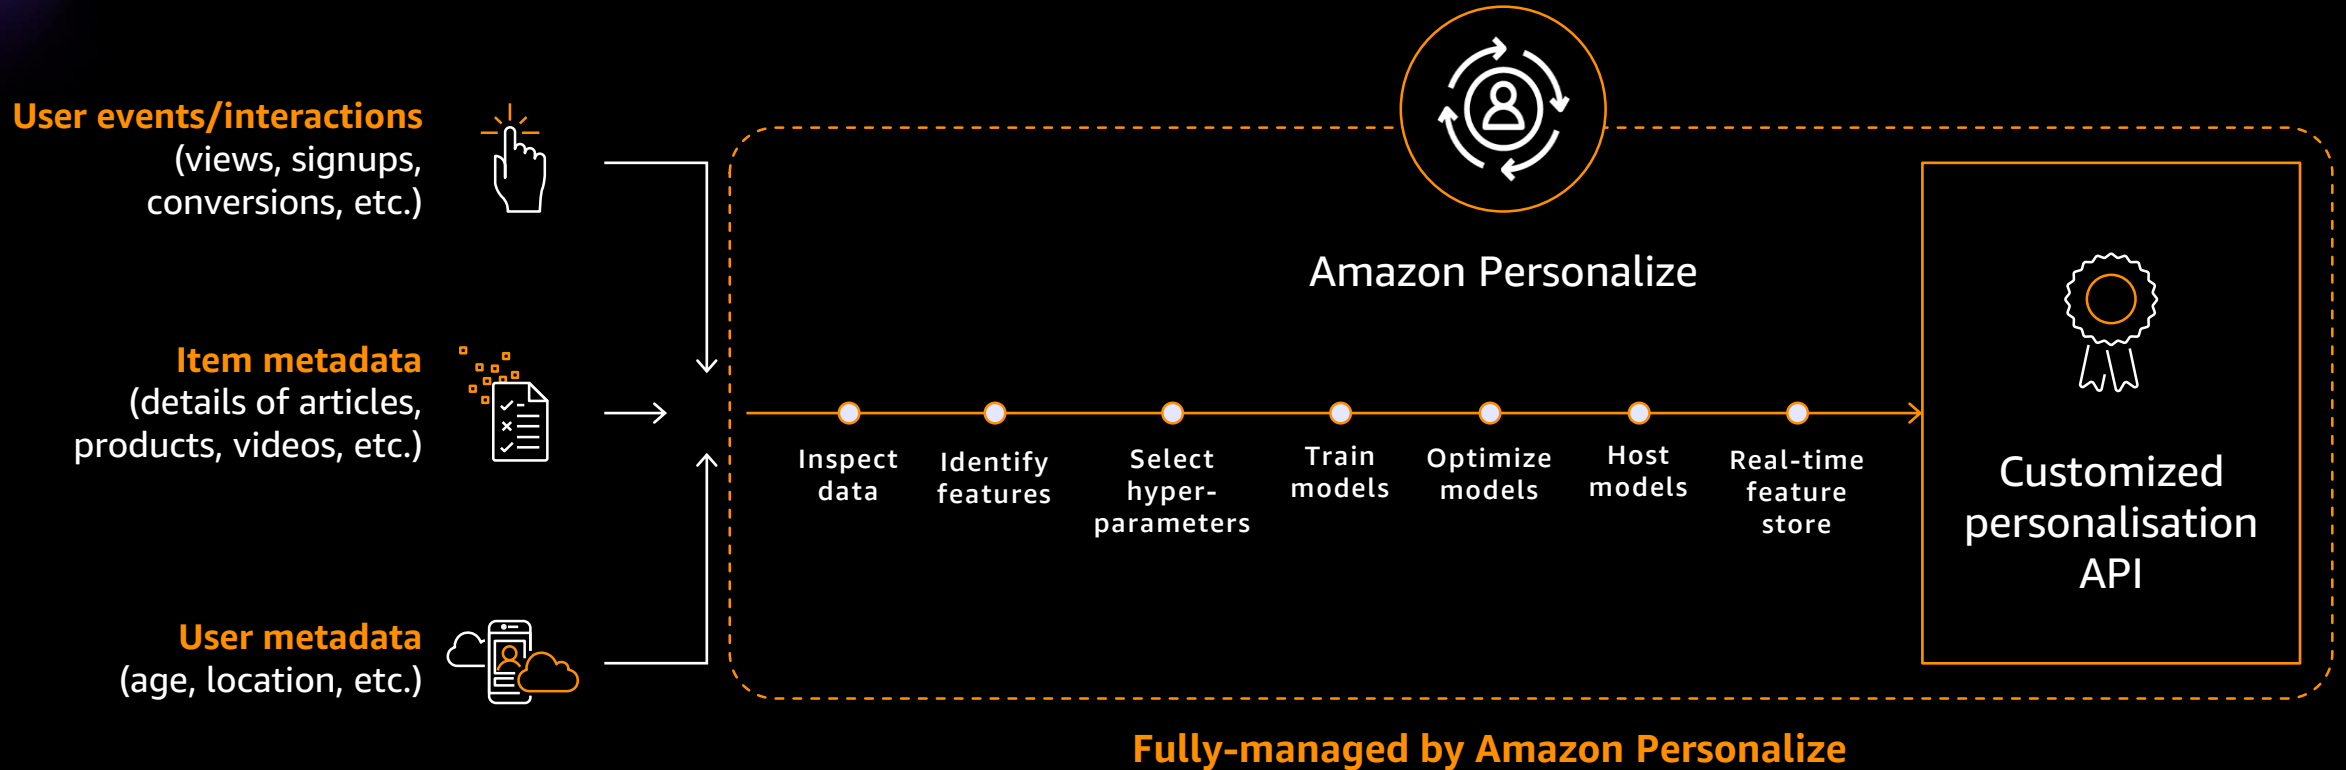

NOW

Delivering sophisticated, unique experiences to customers across channels and devices using machine learning

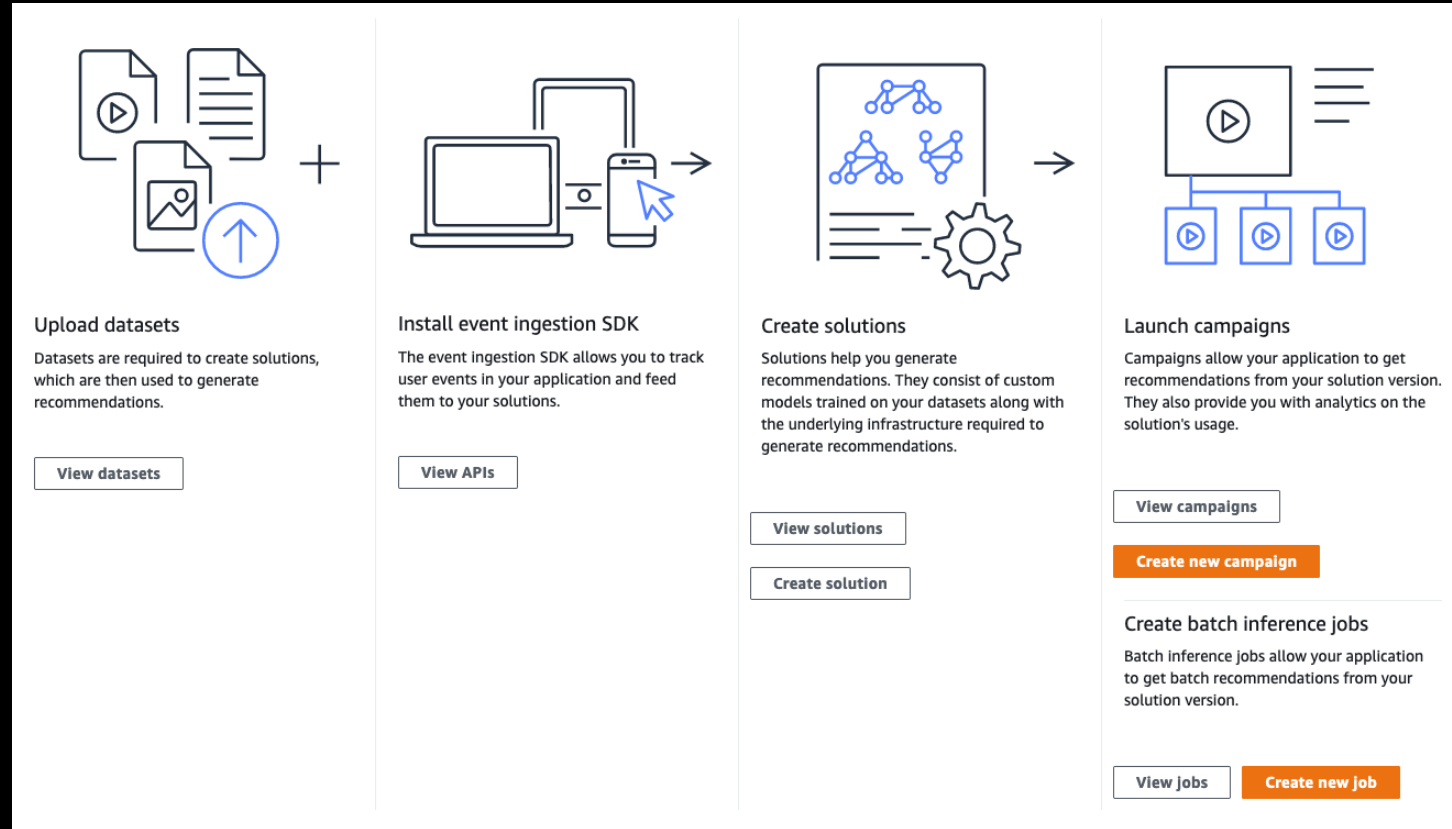

HOW IT WORKS

Amazon Personalize

How to get started with Amazon Personalize?

THREE EASY STEPS

Data Ingestion
(Schema and Dataset)

Training

Inference

How to get started with Amazon Personalize?

CONFIGURE THE DATA

```
schema = {  
    "type": "record",  
    "name": "Interactions",  
    "namespace": "com.amazonaws.personalize.schema",  
    "fields": [  
        {  
            "name": "USER_ID",  
            "type": "string"  
        },  
        {  
            "name": "ITEM_ID",  
            "type": "string"  
        },  
        {  
            "name": "TIMESTAMP",  
            "type": "long"  
        }  
    ],  
    "version": "1.0"  
}
```

Required for Interactions

```
create_schema_response = personalize.create_schema(  
    name="personalize-demo-schema",  
    schema=json.dumps(schema)  
)  
  
schema_arn = create_schema_response['schemaArn']
```

How to get started with Amazon Personalize?

CONFIGURE THE DATA

Datasets are required to create solutions, which are then used to generate recommendations.

Dataset Group creation in Python with boto3:

```
personalize.create_dataset_group(  
    name="personalize-launch-demo"  
)
```

Dataset creation:

```
dataset_type = "INTERACTIONS"  
personalize.create_dataset(  
    name="personalize-launch-interactions",  
    datasetType=dataset_type,  
    datasetGroupArn=dataset_group_arn,  
    schemaArn=schema_arn  
)
```

How to get started with Amazon Personalize?

IMPORT THE DATA

Import the events with the SDKs and through Amazon S3

Dataset import job creation:

```
bucket = "yourbucket"
filename = "interactions.csv"

create_dataset_import_job_resp = personalize.create_dataset_import_job(
    jobName="personalize-demo-import1",
    datasetArn=dataset_arn,
    dataSource={
        "dataLocation": "s3://{}/{}".format(bucket, filename)
    },
    roleArn=role_arn
)
```

How to get started with Amazon Personalize?

CREATE THE SOLUTION AND VERSION

Solutions help you generate recommendations. They consist of custom models trained on your datasets along with the underlying infrastructure required to generate recommendations.

Recipe:

```
recipe_arn = "arn:aws:personalize:::recipe/aws-user-personalization"
```

Solution creation:

```
create_solution_response = personalize.create_solution(  
    name="personalize-demo-soln-user-personalization",  
    datasetGroupArn=dataset_group_arn,  
    recipeArn=recipe_arn  
)
```

Solution version creation:

```
create_solution_version_response = personalize.create_solution_version(  
    solutionArn=solution_arn  
)
```

Retrieve Solution metrics:

```
get_solution_metrics_response = personalize.get_solution_metrics(  
    solutionVersionArn=solution_version_arn  
)
```

How to get started with Amazon Personalize?

CREATE CAMPAIGN

Campaigns allow your application to get recommendations from your solution version. They also provide you with analytics on the solution's usage.

Campaign creation:

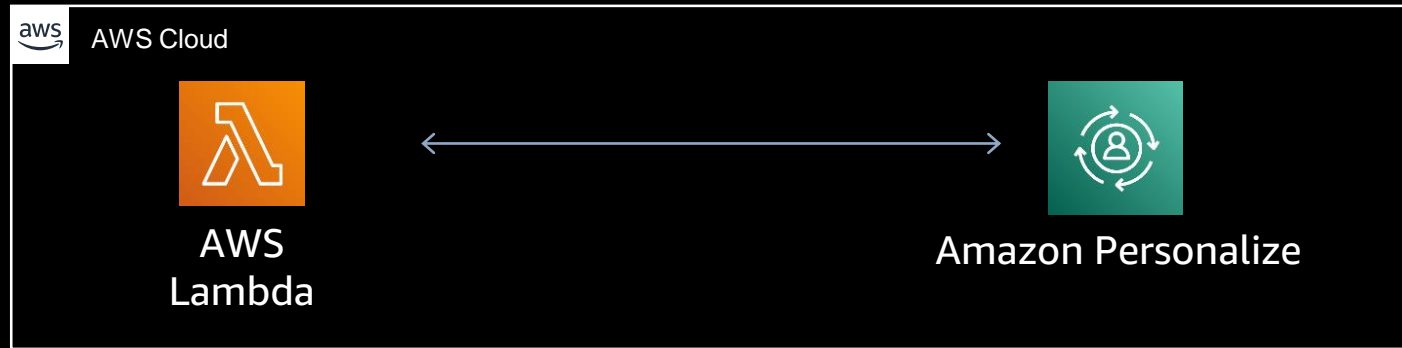

```
create_campaign_response = personalize.create_campaign(  
    name="personalize-demo-camp",  
    solutionVersionArn=solution_version_arn,  
    minProvisionedTPS=1,  
    campaignConfig={"itemExplorationConfig": {"explorationWeight":  
        "0.5"}}  
)
```

Checking progress:

```
max_time = time.time() + 3 * 60 * 60 # 3 hours  
while time.time() < max_time:  
    describe_campaign_response = personalize.describe_campaign(  
        campaignArn=campaign_arn  
    )  
    status = describe_campaign_response["campaign"]["status"]  
    print("Campaign: {}".format(status))  
    if status == "ACTIVE" or status == "CREATE FAILED":  
        break  
    time.sleep(60)
```

How to get started with Amazon Personalize?

GET RECOMMENDATIONS FROM YOUR SERVERLESS APPLICATION

```
get_recommendations_response = personalize_runtime.get_recommendations(  
    campaignArn=campaign_arn,  
    userId=str(user_id),  
)
```

RED HOT DESTINATIONS

DISCOVER THE BEST HAWAII HAS TO OFFER WITH THIS ALL INCLUSIVE 28 DAY TOUR

Find out more

Today's flight specials

London to Prague <i>Jewel of the East</i>	\$159	4 HOURS TO GO
Paris to London <i>Weekend getaway!</i>	\$85	3 HOURS TO GO
Dubai to Cairo <i>Middle East adventure</i>	\$140	50 MINUTES TO GO
Melbourne to Hawaii <i>Escape to the sun this winter</i>	\$517	4 HOURS TO GO

Today's hotel specials

Sommerset Hotel - Sydney <i>Minimum stay 3 nights</i>	\$197	7 MINUTES TO GO
Freedmom Apartments - Sydney <i>Pets allowed!</i>	\$288	3 HOURS TO GO
Studio City - Los Angeles <i>Minimum stay one week</i>	\$245	3 HOURS TO GO

AWS Machine Learning (ML) Training and Certification

AWS is how you build machine learning skills

Courses built on the curriculum leveraged by Amazon's own teams. Learn from the experts at AWS.

aws.training/machinelearning

Flexibility to learn your way

Learn online with on-demand digital courses or live with virtual instructor-led training, plus hands-on labs and opportunities for practical application.

explore.skillbuilder.aws/learn

Validate your expertise

Demonstrate expertise in building, training, tuning, and deploying machine learning models with an industry-recognized credential.

aws.amazon.com/certification

Thank you for attending AWS Innovate – AI/ML Edition

We hope you found it interesting! A kind reminder to **complete the survey**.
Let us know what you thought of today's event and how we can improve the event experience for you in the future.
