

INNOVATE

DATA AND AI/ML EDITION

22 February 2023

Getting started on your ML journey: A leader's perspective

Naomi Teng

AI/ML Business Development Specialist – Asia Pacific and Japan
Amazon Web Services (AWS)

Agenda

- Session overview
- Reality check
- Why now?
- 6 key drivers of success
- Resources to start your ML journey

Machine learning is the future

Machine learning is ~~the future~~
happening now

AI and Machine Learning

AI's Promise

The allure and promise of Artificial Intelligence / Machine Learning is compelling

Barriers to Entry

Technology providers are democratising machine learning and lowering the initial technical and skills barriers to entry

Proof of Concepts

Machine Learning experiments and PoC's are getting easier, faster and cheaper to execute

Machine learning is transformative*

*causing or able to cause an important and lasting change in someone or something

1 Get your
data in
order

Understanding your data strategy

What data is **available today**?

What data can be made **easily available**?

In one year, what data will we wish we had started collecting today?

2 Understanding where to apply ML

Picking your first use case: balance speed with value

- 1 Can you achieve success in the next 6-10 months?
- 2 Does it solve a real problem for the business?
- 3 Are there places where you already have a lot of untapped data?
- 4 Does it need machine learning?

Where to apply ML

DATA READINESS

Low ←————→ High

BUSINESS IMPACT

Low ←————→ High

ML APPLICABILITY (Chance of success based on state of the art and team skills)

Low ←————→ High

Where to apply ML

DATA READINESS

BUSINESS IMPACT

ML APPLICABILITY (Chance of success based on state of the art and team skills)

Frustrated data scientist

Where to apply ML

DATA READINESS

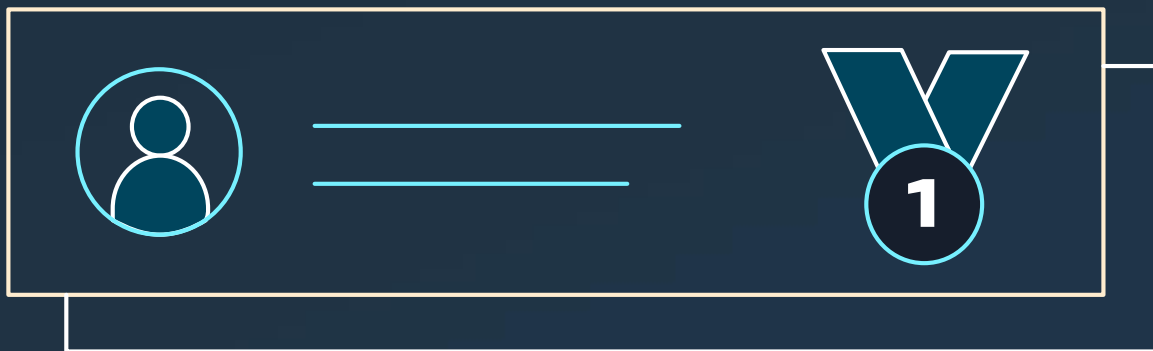

BUSINESS IMPACT

ML APPLICABILITY (Chance of success based on state of the art and team skills)

Good prototype to build experience

3

Developing
your team

97m

Jobs created by the growth of AI in the next few years

World Economic Forum

[Learn more](#)

33%

Organizations prefer to upskill their current staff to grow ML capabilities

Deloitte Access Economics

Develop your team – Technical experts

- Build your team
- Broadly enable all developers to use ML
- Training, training, training

Domain experts

Technical experts

4 Championing a Culture of AI

Crossing the culture chasm

People, Process and Technology

Executive Sponsorship

How will you use machine learning?

“We won’t” is not an acceptable answer

Setting expectations

- Set big, top-down goals
- Be tolerant of failure
- Take a long-term view
- Celebrate success

5 Remove undifferentiated heavy lifting

Why AWS for ML?

BROADEST AND DEEPEST SET OF AI AND ML SERVICES

257 new features and services launched in the last year for everyone from ML scientists to application developers

ACCELERATE YOUR ADOPTION OF ML

Amazon SageMaker creates efficiencies and lowers costs
Acceleration programs and trainings

BUILT ON THE MOST COMPREHENSIVE CLOUD PLATFORM

The strongest set of compute, storage, security, database, and analytics capabilities to build upon

6 Architect for tomorrow, build for today

Taking applications to production

Write

Write source code for your software

Build

Build / compile the software

Test

Test to make sure it works as expected

Deploy

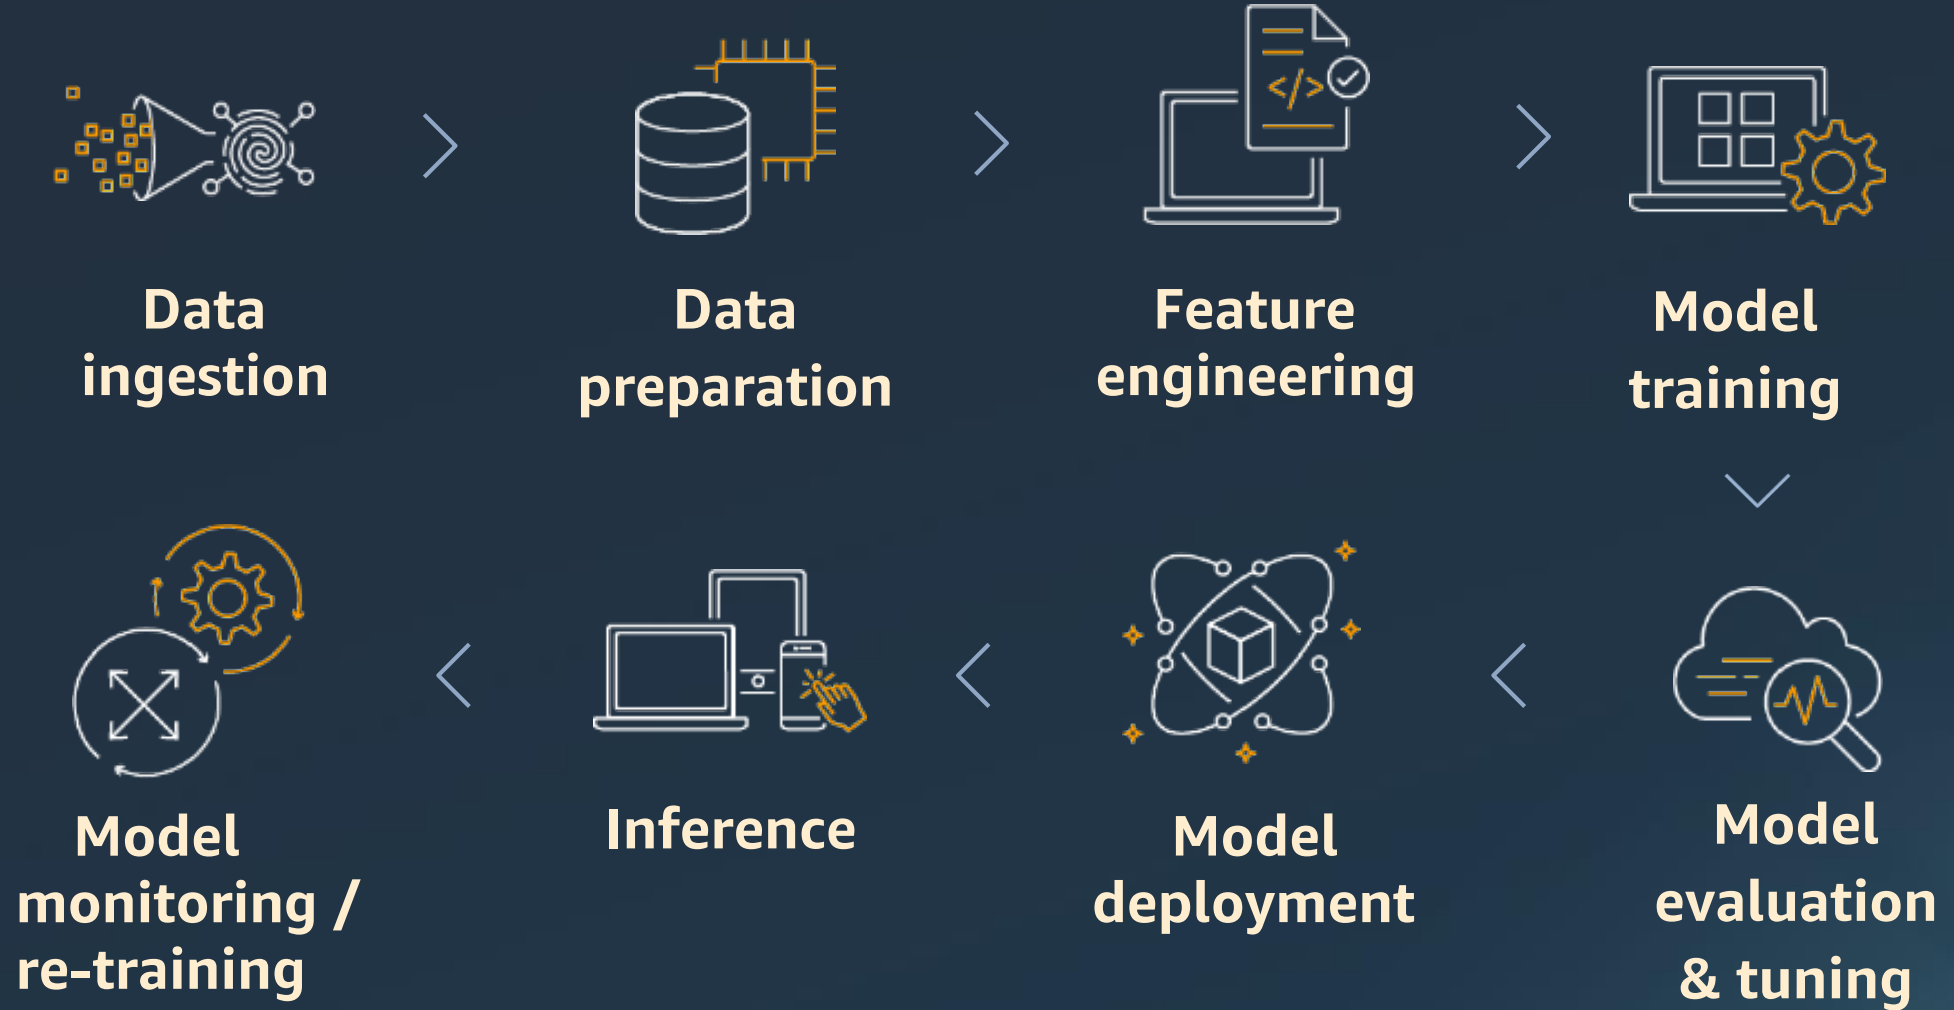

Deploy the software to servers

Use

Use the software in production

Taking Machine Learning models to production

Pillars of AWS Well-Architected

Operational
Excellence

Security

Reliability

ML Lens for Well-Architected Framework

Well-Architected pillar	Key Best Practices for ML
Cost Optimization	Use managed services to reduce cost
Operational Excellence	Version ML inputs and artifacts Automate machine learning deployment pipelines
Reliability	Train once and deploy across environments
Security	Restrict access to ML services
Performance Efficiency	Continuously monitor and measure system performance

Get your journey off to a great start

- 1 Get your data in order
- 2 Understanding where to apply ML
- 3 Developing your team
- 4 Championing a Culture of AI
- 5 Remove undifferentiated heavy lifting
- 6 Architect for tomorrow, build for today

Visit the Data & AI/ML resource hub

Dive deeper into these resources, get inspired and learn how you can use AI and machine learning to accelerate your business outcomes.

- 6 steps to machine learning success e-book
- 7 leading machine learning use cases e-book
- Machine learning at scale e-book
- Achieving transformative business results with machine learning e-book
- Tackling our world's hardest problems with machine learning e-book
- Accelerating machine learning innovation through security e-book
- ... and more!

AWS Training and Certification

Access the AI & ML learning plan courses built by AWS experts on AWS Skill Builder

- Get started with digital self-paced, on-demand training and ramp-up guides to help you grow your technical skills
- Learn how to apply machine learning, artificial intelligence, and deep learning to unlock new insights and value in your role
- Take the steps today, towards validating your expertise with an AWS Certified Machine Learning – Specialty Certification
